

# Life Science Angels™

Investing for life

## Fact Sheet

### LSA is...

*The premier angel investment group focused exclusively on early stage biotechnology and medical device companies*

### Purpose

- Provide a funding source to emerging life science companies that are typically below the threshold for VCs and traditional funding sources
- Identify and present well-vetted private equity investment opportunities for investment
- Simplify the investment vehicle for members, companies and follow-on investors
- Contribute business and scientific expertise to companies to improve success post-funding
- Communicate frequently and openly with members, sponsors and companies

### Organization

- Founded and managed by experienced angel investors and life science executives
- Non-profit organization run for the benefit of the members
- Operations funded by life science firms including PWC, SVB, WSGR, Jefferies and Boston Scientific
- No override or management fees; all work performed on pro bono basis except Managing Director

### Membership

- Over 100 executives, entrepreneurs, scientists and engineers from biotech and medtech industries
- All accredited individual investors with business and scientific expertise in life sciences
- Fifteen premier VC members including Clarus, CMEA, DeNovo, Sofinnova, Skyline, Vulcan, and others
- Active member participation in deal sourcing, due diligence, membership screening, coaching, etc.
- Minimum investment requirement of \$50,000/year; \$1,000/year individual membership fee

### Investment Opportunities

- Robust deal flow from founders, members, sponsors, venture capitalists and universities
- Opportunities must meet defined investment criteria and pass Investment Committee due diligence prior to presentation to membership
- Targeted investment range of \$250,000 to \$1 million per company per round
- Invested \$8 million in 14 companies with almost \$200 million in follow-on funding since April 2005
